

Interlocking Industrial Floor Tiles

Description

Non-ESD Interlocking Industrial Floor Tiles are available in two interlocking dovetail joint designs, T-joint as standard. Our 7mm tiles are a popular solution for most applications, including warehouses, garages and factories. The tiles easily withstand repetitive use by forklifts, pallet trucks, heavy foot traffic, aisle pickers and pump trucks. They can improve workplace safety with an R10 slip rating and Bfl-S1 fire rating. The tiles are available in a variety of colours including light grey, dark grey, graphite, black, yellow, dark blue, green and red. Colours can be mixed to create walkways and colour-coded zones. The tiles have a good resistance to most commonly used chemicals. Available in smooth or raised disk. Tiles can be loose-laid. ESD version available.

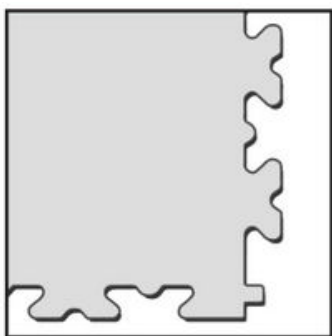

Applications

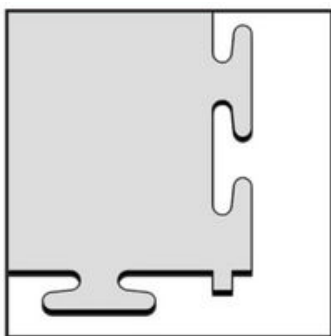

- Factories & Warehouses
- Railway Stations & Airports
- Shops & Offices
- Schools & Colleges
- Garages & Workshops
- Exhibitions & Point of Sale
- Sports & Leisure Facilities
- Prisons, Police & Fire Stations

in T-Joint design)**

Perfect for Businesses Who Cannot Afford to Stop.

Interlocking Industrial Floor Tiles can be fitted in sections, allowing you to continue operation during installation. The tiles are ready to use immediately, without the curing or drying times associated with resin, screed or paint.

Recyclable and Long-Lasting.

Our long-lasting products are designed to help you reduce costs and environmental impact. Once the tiles reach the end of their useful 20+ year lifespan, they can be recycled.

Guaranteed Quality.

The tiles are proudly made in Britain by our supplier. Each and every floor tile is manufactured to the highest quality standards and every element of the product composition is strictly controlled.

Easy to Install. Simple to Repair if You Ever Need to.

Interlocking Industrial Floor Tiles are protective subfloors that are both cost-effective and hassle-free. With Interlocking Industrial Floor Tiles, repair costs of damaged and worn concrete are eliminated for good. The tiles are easy to install. They can be simply installed directly over an existing floor without adhesives, damp-proof membranes or screed. Tile installation can be completed by our professional installation team, or they can be installed by yourself. Unlike other floor coverings, our Interlocking Industrial Floor Tiles are simple to repair and extend. The tiles can be easily lifted and replaced by yourself. If your business is scaling or changing, you can adapt the floor layout to suit.
