

Dental Probe

770054SL

Description

Our Dental Probe (770054SL) is a high quality precision instrument made with a non-magnetic stainless-steel alloy. This slim-line dental probe is a simple soldering aid which offers great precision when scraping away excess solder and flux residue. Ideal for use on circuit boards and solder applications. Compliant to the IEC 61340-5-1 International Standard. RoHS and REACH compliant. CE approved.

Product Features:

- Length: 160mm.
- Material: Stainless steel (uninsulated).
- Application: For dental scaling and general purpose use.
- Design: Slim-line handle and strong fine point.

ESD Standards & Regulations Met:

RoHS Compliant
